

COVID-19 Vaccine Information from Casa Central

Our staff has started getting vaccines so that we can continue to support everyone's health and safety, and we encourage others to do the same!

The vaccine is available at no cost. **For more information, we recommend you talk with your primary care physician to find out when you will be eligible to receive it and how to access it.**

WHY SHOULD I TAKE THE VACCINE?

Research has demonstrated that the vaccine is 95% effective in preventing COVID-19. The COVID-19 vaccine will help keep you, your family, and your community healthy and safe. In particular, older adults have a higher risk for severe illness and hospitalization if they get COVID-19.

IS THE VACCINE SAFE?

We understand that some people may be concerned about getting vaccinated. The COVID-19 vaccine was tested with thousands of participants to generate scientific data and other information in order to determine its safety and to get approval from the Food and Drug Administration.

SIDE EFFECTS

Short-term side effects are mild and may include fever, fatigue, muscle and joint pain, chills and sore arms. They will go away in a few days, but they are normal and a sign your body is working to build up protection against the virus.

MYTH: If I get vaccinated for COVID-19 I'll be more vulnerable to other illnesses.

FACT: While the COVID-19 vaccine will work to teach your immune system to recognize and protect against coronavirus, it is not proven to make you vulnerable to other illnesses.

MYTH: After I get the vaccine, I no longer have to wear a mask.

FACT: While health experts learn more about the protection of COVID-19 vaccines, **it will be important for everyone to continue to wear a mask, wash hands often, and practice social distancing.**
